

# Coagulants

SWT provides a full line of coagulant products for wastewater clarification. These products are designed to work in conjunction with SWT's Insolmet<sup>®</sup> and Metal-Rec lines of precipitants. A wide variety of coagulant options are available to provide the best mix of water clarity, upset minimization, sludge generation, ease of use, and product cost. Because we are a manufacturer, not a reseller, we can provide custom blends to meet specific needs. In most cases, we can go from laboratory testing to production in just a few days. Some of our most popular coagulant products are:

## Aluminum Based:

SWT-976  
SWT-977  
SWT-1019  
SWT-1076

SWT-1405  
SWT-2077  
SWT-2810

## Calcium Based:

SWT-946  
SWT-975  
SWT-978

## Iron Based:

SWT-732A  
SWT-832  
SWT-844  
SWT-1020  
SWT-1030

## Polymer Based:

SWT-1238  
SWT-1254  
SWT-8822
